1.7 ASSUMPTIONS, DISCLAIMERS, LIMITATIONS & QUALIFICATIONS TO VALUATION

While the Valuation Report has been prepared independently by the Valuer, the report and this summary is subject to the following:

- a. The valuation exercise is based on prevailing market dynamics as on the date of valuation without taking into account any unforeseeable event or developments which could impact the valuation in the future.
- b. The outbreak of COVID-19, declared by the World Health Organisation as a Global Pandemic on the 11th March 2020, and has continued to impact many aspects of daily life and the global economy. Individual markets have reacted differently to the COVID-19 outbreak, aftermath and further waves. Travel, movement and operational restrictions have been implemented by many countries. In some cases, lockdowns have been applied to varying degrees and to reflect further waves of COVID-19. The pandemic and the measures taken to tackle COVID-19 continue to affect economies and real estate markets globally. In India as well, the government has adopted similar measures to contain the spread of Covid-19 which has caused business disruption impacting the economic activity. Although these may imply a new stage of the crisis, they are not unprecedented in the same way as the initial impact. As per WHO, there are more than 250 COVID-19 vaccine candidates at different stages of trials. COVID-19 vaccine in India was launched on 16 January 2021. This was initially deployed to essential services workers and senior citizens. The coverage has now been expanded to people aged 18 years and above and with increased coverage in subsequent months, it can reasonably be expected that disruptions caused by the pandemic would subside in the coming year. The commercial real estate sector has so far shown reasonable resilience to the disruptions caused by Covid-19. With the gained intelligence about the pandemic and rapid progress witnessed in the development and deployment of the vaccine, we expect the corporates to resume their operations from their respective office spaces, as the situation starts to stabilize soon. This is expected to be followed by the demand for commercial office spaces, which have been vacated due to pandemic over the last year, to come back and then the demand for additional commercial office spaces is expected to arise, as the deferred corporate decision-making starts to materialize. Therefore, we expect slow recovery in the demand for commercial real estate in short-mid term before the demand resumes its long-term trajectory.
- c. The valuation exercise is not envisaged to include all possible investigations with respect to the Subject Properties and wherein certain limitations to the investigations and inspections carried out are identified so as to enable the Reliant Party/Parties to undertake further investigations wherever considered appropriate or necessary prior to reliance. The Valuer is not liable for any loss occasioned by a decision not to conduct further investigation or inspections.
- d. Assumptions, being an integral part of any valuation exercise, are adopted as valuation is a matter of judgment and many parameters utilized to arrive at the valuation opinion

may fall outside the scope of expertise or instructions of the Valuer. The party relying on this report accepts that the valuation contains certain specific assumptions and acknowledge and accept the risk that if any of the assumptions adopted to arrive at the valuation estimates turns out to be incorrect, there may be a material impact on the valuations.

- e. The valuation exercise is based on the information shared by the Instructing Party or the Client, which has been assumed to be correct and used to conduct the valuation exercise. In case of information shared by any third party and duly disclosed in the report, the same is believed to be reasonably reliable, however, the Valuer does not accept any responsibility should those prove not to be so.
- f. Any statement regarding any future matter is provided as an estimate and/or opinion based on the information known at the date of this report. No warranties are given regarding accuracy or correctness of such statements.
- g. Any plan, map, sketch, layout or drawing included in this report is to assist reader in visualizing the relevant property and are for representation purposes only, with no responsibility being borne towards their mathematical or geographical accuracy.
- h. Except as disclosed by the Client, it is assumed that the Subject Properties are free from any encroachments and available on the date of valuation.
- i. For the purpose of this valuation exercise, reliance has been made on the Title Reports prepared by the Legal Counsels for each of the Subject Properties and no further enquiries have been made with authorities in this regard. It is understood that the Subject Properties have encumbrances, disputes and claims, however, the Valuer does not have the expertise or the purview to verify the veracity or quantify these encumbrances, disputes or claims. For the purpose of this valuation exercise, it is assumed that respective Subject Properties have clear and marketable titles.
- j. The current zoning of the Subject Properties has been assessed on the basis of review of various documents including title reports shared by the Instructing Party and the current land use maps publicly available. The same has been considered for the purpose of this valuation exercise. Additionally, it is also assumed that the development on the Subject Properties adheres/would adhere to the development regulations as prescribed by the relevant authorities. No further enquiries have been made with the competent jurisdictional authorities to validate the legality of the same.
- k. The total developable/developed area, leasable area, site/plot area considered for this valuation exercise is based on the Architect's Certificate shared by the Instructing Party and the same has been checked against the approvals/layout plans/building plans provided by the Client. However, no additional verification and physical measurement for the purpose of this valuation exercise has been undertaken.
- l. In absence of any information to the contrary, it is assumed that there are no abnormal ground conditions nor archaeological remains present which might adversely affect the current or future occupation, development or value of the Subject Properties and the Subject Properties are free from any rot, infestations, structural or latent defect; no

currently known deleterious or hazardous materials or suspect techniques are used in construction or subsequent alterations or additions to the property and comments made in the property details do not purport to express an opinion about an advice upon the conditions of uninspected parts and should be taken as making an implied representation or statement about such parts.

- m. It is also stated that this is a valuation report and not a structural survey.
- n. Unless specifically disclosed in the report, no allowances are made with respect to any existing or proposed local legislation relating to taxation on realization of the sale value of the Subject Properties.
- o. Given the evolving and maturing real estate markets in India, comparable evidences, if any or market quotes provided has been limited to basic details such as area of asset, general location, price/rate of transaction or sale and any other specific details that are readily available in public domain only shall be shared. Any factual information such as tenants' leasable area, lease details such as, rent, lease/rent commencement and end dates, lock-in period, rent escalation terms etc. with respect to Subject Properties is based on the documents/information shared by the Client/Instructing Party and the same has been adopted for the purpose of this valuation exercise. While few lease deeds have been reviewed on a sample basis, the Valuer does not take any responsibility towards authenticity of the rent rolls shared by the Client. Any change in the aforementioned information will have an impact on the valuation estimates and, in that case, the same would need to have a relook. The relevant information sources are mentioned in section 2.5.
- p. All measurements, areas and property age quoted/mentioned in the report are approximate.
- q. The Valuer is not an advisor with respect to any tax, regulatory or legal matters regarding the proposed transaction. No investigation or enquiries on the holding entity or any SPV's claim on the title of the Subject Properties has been made and the same is assumed to be valid based on the information shared by the Client/Instructing Party. No consideration shall be / has been given to liens or encumbrances against them. Therefore, no responsibility is assumed for matters of a legal nature.
- r. Kindly note that quarterly assessment of cash flows has been undertaken for the purpose of this valuation exercise.

2 Valuation Approach and Methodology

2.1 PURPOSE OF VALUATION

The purpose of this valuation exercise is to estimate the value of the Subject Properties as part of the portfolio of Mindspace REIT for the disclosure of valuation of assets, forming part of the portfolio of Mindspace REIT, in accordance with the Securities and Exchange Board of India (Real Estate Investment Trusts) Regulations, 2014, as amended, together with clarifications, guidelines and notifications thereunder in the Indian stock exchanges together with the clarifications, guidelines and notifications thereunder in the Indian stock exchanges and for accounting purposes.

2.2 BASIS OF VALUATION

Given the purpose of valuation as mentioned above, the valuation exercise has been carried out to estimate the “Market Value” of the Subject Properties in accordance with the IVSC International Valuation Standards issued on 31 July 2019, effective from 31 January 2020.

Market Value is defined as ‘The estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm’s-length transaction after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion.’

2.3 VALUATION APPROACH

The basis of valuation for the Subject Property being Market Value, the same may be derived by any of the following approaches:

2.3.1 Market Approach

In ‘Market Approach’, the Subject Property is compared to similar properties that have actually been sold in an arms-length transaction or are offered for sale (after deducting for value of built-up structure located thereon). The comparable evidence gathered during research is adjusted for premiums and discounts based on property specific attributes to reflect the underlying value of the property.

2.3.2 Income Approach

The income approach is based on the premise that value of an income - producing asset is a function of future benefits and income derived from that asset. There are two commonly used methods of the income approach in real estate valuation namely, direct capitalization and discounted cash flow (DCF).

i. Income Approach - Direct Capitalization Method

Direct capitalization involves capitalizing a 'normalized' single - year net income estimated by an appropriate yield. This approach is best utilized with stable revenue producing assets, whereby there is little volatility in the net annual income.

ii. Income Approach - Discounted Cash Flow Method

Using this valuation method, future cash flows from the property are forecasted using precisely stated assumptions. This method allows for the explicit modelling of income associated with the property. These future financial benefits are then discounted to a present-day value (valuation date) at an appropriate discount rate. A variation of the Discounted Cash Flow Method is mentioned below.

iii. Income Approach - Discounted Cash Flow Method using Rental Reversion

The market practice in most commercial/ IT developments involves contracting tenants in the form of pre-commitments at sub-market rentals to increase attractiveness of the property to prospective tenants. Such benefits are typically extended to anchor tenants. Additionally, there are instances of tenants paying above-market rentals for certain properties as well (primarily owing to market conditions at the time of contracting the lease). In order to arrive at a unit value for these tenancies, we have considered the impact of such sub/above market leases on the valuation of the Subject Property.

For the purpose of the valuation of Subject Properties (other than the portions of future development area part or whole of which may be considered for sale), Income Approach - Discounted Cash Flow Method using Rental Reversion has been adopted.

2.4 VALUATION METHODOLOGY

In case of Subject Properties there are instances where the contracted rents are significantly different from prevailing rents in the concerned micro-market where the specific Subject Property is located, either because the rents prevailing at the time of executing the leases have been significantly different or discounts were given to large/anchor tenants.

Since the real estate industry is dynamic and is influenced by various factors (such as existing supply, demand for spaces, quality of spaces available in the market, overall health of the economy, existing rentals, future growth plans, etc.) at a particular point in time, negotiated rents may tend to move away from the prevalent market rents over a period of time.

It has also been witnessed that the market rents for some properties or micro-markets increase or decrease at a rate significantly different from those agreed to in initial leases. These factors reinforce the need to review each of these leases in isolation to assess the intrinsic value of the property under review.

Given the purpose and the nature of Subject Properties involved, the valuation of the commercial office assets has been undertaken using the Discounted Cash Flows method using Rental Reversion, for Facilities Management as well as Power Distribution, Discounted Cash Flow method has been adopted and for portions of future development area part of or whole of which may be considered for sale, Market Approach has been adopted. Further the following steps have been adopted as part of the valuation exercise, which have been elaborated in the detailed full valuation report ("Valuation Report").

2.4.1 Asset-specific Review:

- i. As the first step to the valuation of the asset, the rent rolls (and the corresponding lease deeds on a sample basis) were reviewed to identify tenancy characteristics for the asset. As part of the rent roll review, major tenancy agreements belonging to tenants with pre-committed area were reviewed on a sample basis.
- ii. For anchor/large tenants, adjustments on marginal rent or additional lease-up timeframe have been adopted upon lease reversion.
- iii. Title certificates, architect certificates and other related documents as mentioned in earlier sections of the report were reviewed for validation of area details, ownership interests of the Subject Property.
- iv. Physical site inspections were undertaken to assess the current status of the Subject Properties.

2.4.2 Micro-market Review:

For the purpose of the valuation exercise, reliance has been placed on the market report prepared by Cushman & Wakefield (CWI), who has been appointed by the Client as an independent consultant to carry out industry and market research. Accordingly, the review was carried out in the following manner:

- i. An assessment of the site and surroundings has been undertaken with respect to the prevailing activities, market dynamics impacting the values and the current use of the respective properties vis-à-vis its locational context, etc. of commercial office assets. Analysis of the micro-market was undertaken primarily based on the findings of the industry/market report prepared by Cushman & Wakefield and readily available information in public domain to ascertain the transaction activity of commercial/IT office space. The analysis entailed review of comparable assets in terms of potential competition (both completed and under-construction/future developments), comparable recent lease transactions witnessed in the micro-market along with the historical leasing and re-leasing history within the asset over the last 2-3 years, if available. This was undertaken to assess the market rent (applicable rental for the micro-market where the asset is located) and achievable market rent (Valuer's view on achievable rent for the Subject Properties for leasing vacant spaces as well as upon re-leasing).
- ii. Valuer also analysed the historical leasing within the asset for anchor tenants to identify the discount that is extended to such tenants at the time of fresh leasing or lease renewals. Rent roll and sample of lease deeds of large anchor-tenants were analysed and applicable adjustments to marginal rent was estimated for individual leases. For other tenants occupying relatively large space within the Subject Properties, it is assumed that the leases shall revert to marginal rents (duly adjusted from the date of valuation) following the expiry of the lease, factoring appropriate re-leasing time.

2.4.3 Cash Flow Projections:

- i. The cash flows for the operational and under-construction/future development area have been projected separately to arrive at their respective value estimates.
- ii. Net operating income (NOI) has primarily been used to arrive at the value of the commercial office assets. The following steps were undertaken to arrive at the value for operational and under-construction/ future development areas respectively.

The projected future cash flows from the property are based on existing lease terms for the operational area till the expiry of the leases or re-negotiation, whichever is earlier, following which, the lease terms have been aligned with market rents achievable by the Subject Properties. For vacant area and under-construction/ future development area, the achievable market rent-led cash flows are projected factoring appropriate lease-up time frame for vacant/under-construction/future development area. These cash flows have been projected for 10-year duration from the date of valuation and for 11th year (for assessment of terminal value based on NOI). These future cash flows are then discounted to present-day value (valuation date) at an appropriate discount rate.

For each lease, principally, the following steps have been undertaken to assess the rent over a 10-year time horizon:

Step 1: Projecting the rental income for identified tenancies up to the period of lease expiry, lock-in expiry, escalation milestones, etc. whichever is applicable. In the event of unleased spaces, market-led rent is adopted with suitable lease-up time.

Step 2: Generating a market led rental income stream for identified tenancies for the time period similar to the cash flows drawn in the aforementioned step.

Step 3: In the event the escalated contracted rent is higher than the achievable market rent by 15%, the contracted terms are ignored, and the terms are reverted to market. In the event the escalated contracted rent is below 115% of the achievable rent, the contracted terms are adopted going forward until the next lease review/ renewal. Intent of this step is to project the rental income for respective leases until lease expiry as well as post expiry.

Step 4: Computing the monthly rental income projected as part of Step 3 and translating the same to a quarterly income (for the next 10 years and NOI of the 11th year – considered for calculation of terminal value).

- iii. Recurring operational expenses, fit-out income (if any – the same has not been included in the NOI for the purpose of arriving at the terminal value by capitalisation) and vacancy provision have been adopted in-line with prevalent market dynamics. In addition, appropriate rent-free periods have been adopted during lease roll-overs to consider potential rent-free terms as well as outflows towards brokerage. For all commercial office assets, operational revenues and expenses of the respective assets are reviewed to understand the recurring, non-recurring, recoverable and non-recoverable expenses and accordingly estimate the margins on the common area maintenance income which accrues as cash inflows to the Subject Properties.

- iv. The net income on quarterly basis have been projected over the next 10 years and the one year forward NOI (for 11th year) as of end of year 10 has been capitalized to assess the terminal value of the development. The quarterly net cash flows over the next 10 years along with the terminal value estimated at the end of year 10 have been discounted at a suitable discount rate to arrive at the net present value of the cash flows accruing to the commercial office assets through this approach.
- v. For the purpose of valuing the Power Distribution service to the tenants, the cash flows have been projected on the basis of profit margins allowed by the Maharashtra Electricity Regulatory Commission in its latest tariff order for respective power distribution licenses covering the control period from 2020-21 to 2024-25. Thereafter, the same principles have been adopted to project the cash flows till the remaining period of licence for distributing power to tenants/operators by the concerned entity.
- vi. The Facilities Management Services which are planned to be commenced in KRC Infrastructure and Projects Private Limited from the 1st day of the quarter following the listing. For the purpose of valuation, its assumed that the Facilities Management Services will commence effective October 1, 2020 and have been valued based on the proposed terms of the Facility Management Services to be entered into with the SPVs and the current revenue profile projected to capture the addition of new areas getting constructed and improvement of overall occupancies of the Subject Properties keeping normalised EBITDA margins through the projected years and estimating the terminal value using an appropriate earnings multiple, thereafter discounting the cash flows using appropriate discount rate. Deferment of commencement of Facilities Management Services beyond October 1, 2020 would result in suitable adjustments to the valuation.

4.5.8 Power Distribution Services

In accordance with Section 14 (b) of the Electricity Act, 2003 read with Section 4(1) of the SEZ Act, 2005, entities that own and operate SEZ Parks are considered Deemed Distribution

Licensee for supplying electricity to consumers within the SEZ area. Pursuant to the above regulations, Gigaplex Estate Private Limited (SPV) also has the license to distribute power within the Subject Property, wherein it procures power from Power generators/traders supplying to the grid and then distribute it to the end consumers within the Subject Property.

4.5.9 Valuation Approach for Power Distribution Services

Gigaplex Estate Private Limited (SPV) submitted the detailed tariff petition to Maharashtra Electricity Regulatory Commission ("MERC" or the "Commission"), who determined the tariff that may be charged to the customers/operators within the Subject property allowing the licensee to charge cost plus mark up as approved by the Commission to the end users. This mark-up is equivalent to return on its investment comprising annual depreciation on investment, interest expenses on notional debt and return on equity.

4.5.10 Valuation Methodology for Power Distribution Services

Referring to the Commission's latest order for the operational facility, the cash flows from the power distribution services are projected in the following manner:

Step 1: Amount of approved Gross Fixed Assets ("GFA") is considered.

Step 2: Further, Net Fixed Asset (NFA) which is GFA reduced by accumulated depreciation allowed as on date is computed.

Step 3: To compute the EBITDA, mainly return on equity, interest on notional debt, recovery of depreciation, interest on working capital have been added.

Step 4: Power procurement, operational and maintenance expenses are allowed completely pass through.

4.5.11 Valuation Assumptions for Power Distribution Services

Following are the key assumptions in accordance with the Commission order dated 30 March 2020:

Assumptions	Unit	Figure
Gross Fixed Assets (GFA)	INR Million	297
Accumulated Depreciation YTD FY20	INR Million	-37
Notional Equity (30% of GFA)	INR Million	89

4.9.8 Power Distribution Services

In accordance with Section 14 (b) of the Electricity Act, 2003 read with Section 4(1) of the SEZ Act, 2005, entities that own and operate SEZ Parks are considered Deemed Distribution Licensee for supplying electricity to consumers within the SEZ area. Pursuant to the above regulations, KRC Infrastructure and Projects Private Limited (SPV) also has the license to distribute power within the Subject Property, wherein it procures power from Power generators/traders supplying to the grid and then distribute it to the end consumers within the Subject Property.

4.9.9 Valuation Approach for Power Distribution Services

The detailed tariff petition submitted to Maharashtra Electricity Regulatory Commission (MERC or the Commission), by two of the SPVs, namely Gigaplex Estate Private Limited and MindSPACE Business Parks Private Limited has been taken as the basis on which KRC Infrastructure and Projects Private Limited is expected to file its tariff petition. The Commission in those petitions determined the tariff that may be charged to the

customers/operators within the Subject Property allowing the licensee to charge cost plus mark up as approved by the Commission to the end users. This mark-up is equivalent to return on its investment comprising annual depreciation on investment, interest expenses on notional debt and return on equity.

4.9.10 Valuation Methodology for Power Distribution Services

Referring to the Commission's latest order for the operational facility, the cash flows from the power distribution services are projected in the following manner:

Step 1: Amount of approved Gross Fixed Assets ("GFA") is considered.

Step 2: Further, Net Fixed Asset (NFA) which is GFA reduced by accumulated depreciation allowed as on date is computed.

Step 3: To compute the EBITDA, mainly return on equity, interest on notional debt, recovery of depreciation, interest on working capital have been added.

Step 4: Power procurement, operational and maintenance expenses are allowed completely pass through.

4.9.11 Valuation Assumptions for Power Distribution Services

Following are the key assumptions for proposed license in line with Commission's order for Kharadi, Pune.

Assumptions	Unit	Figure
Gross Fixed Assets (GFA)	INR Million	146
Notional Equity (30% of GFA)	INR Million	-4
Notional Debt as on March 2020 (70% of GFA)	INR Million	44
Depreciation rate (Straight Line Method)	% pa	5.3
Remaining License Period	years	22
WACC	%	10.50

4.9.12 Market Value

The market value of the economic interest of MindSpace REIT in the Subject Property comprising only Plot 65 (excluding Facilities Management Services), as on 31 March 2021, is as follows

INR 18,899 Million

(Indian Rupees Eighteen Billion Eight Hundred and Ninety-Nine Million Only)

Note: The above-mentioned value includes the undivided ownership share in the common facilities and infrastructure of the entire campus.

4.9.13 Facilities Management Services

KRC Infrastructure and Projects Private Limited has planned to commence facility management business from the 1st day of the quarter following the listing of Mindspace REIT. For the purpose of valuation, it is assumed that the Facilities Management Services has commenced effective October 1, 2020 to provide such services to the Subject Properties within the portfolio as well as properties with ownership interests of/owned by third parties within the same parks as the Subject Properties of the Portfolio (as mentioned in the following table). Deferment of commencement of Facilities Management Services beyond October 1, 2020 would result in suitable adjustments to the valuation. Facility management services include housekeeping services, management of MEP equipment, façade cleaning, security expenses, repair and maintenance, maintenance of common areas etc. Service charges are levied on a cost plus mark-up basis to the SPVs owned by REIT, which has ownership interest in the Subject Properties.

The facilities management services business shall operate under the brand name CAMPLUS and shall manage the existing operational buildings / area in the Portfolio. In addition, area under-construction/ future development shall also be managed by KRC Infrastructure and Projects Private Limited on completion.

4.9.14 Key Assumptions

Existing Operational Building which will be under facility management	Total area of ~24.8 million sq ft. as at (March 31, 2021) Mix of SEZ and non SEZ building.	The revenue of facility management is linked to the expense for such facility plus mark up, the growth in the revenues from existing tenants are in line with the inflation expectation of 5%.
Expansion in Existing business and Buildings under construction	Total area of ~3.3 million sq ft.	For future development/proposed buildings, revenue and margins of existing properties is considered as a base to compute the projected cash flows of new buildings. Growth in revenue is linked to the improvement in occupancy plus 5% revenue growth from existing tenants. Initially those buildings are likely to have lower margins due to lesser occupancy.

For the purpose of arriving at terminal year income multiple, Indian and International comparable companies listed on various stock exchanges were studied. It was observed that International companies with primary business of facility/property management trade at 10 - 13 times EV/EBITDA multiple. However, there are very limited comparable facility management listed companies. There is only listed comparable company, which offers facility management services in India including security services, cash logistic etc. Given the fact that facility/property management business is limited to Subject Properties within the portfolio as well as properties with ownership interests of/owned by third parties within the same parks as the Subject Properties of the portfolio, we have considered the EV/EBITDA multiple of 13x to compute the exit value post 10 years of cashflows. For the purpose of discounting the future cash flows, a Weighted Average Cost of Capital (WACC) of 11.75% has been used.

4.9.15 Market Value of Facility Management Services

The market value of the full ownership interest in the facility/property management business, as on 31 March 2021 is as follows:

INR 5,979 Million

(Indian Rupees Five Billion Nine Hundred and Seventy-Nine Million Only)
