

INFORMATION SECURITY POLICY

Approving Authority	Board of Directors of Mindspace Business Parks REIT (“the Organization”)
Approval Date	March 28, 2025
Effective Date	This shall come into effect from the date of its approval, i.e. adoption at the meeting of the Board of Directors.
Classification	Public
Version	1.0

Purpose and Objectives

Mindspace Business Parks REIT is a part of K Raheja Corp group. Mindspace Business Parks REIT network has adopted the ISO 27001 security standards which apply a risk-based approach to protect information assets. The ISO is internationally renowned and provides the best practices for managing information security, risks, and controls within the framework of an information security and risk management program to support the Information Security Policy and business objectives.

Objectives

The specific objectives of the “Information Security Policy” are:

- To prevent unauthorized disclosure of information stored or processed on Mindspace Business Parks REIT’s information systems (Confidentiality)
- To prevent accidental or unauthorized deliberate alteration or deletion of information (Integrity)
- To ensure that information is available to authorized people whenever required (Availability)

The policy will provide guidance to ensure that Mindspace Business Parks REIT’s information systems comply with relevant laws and regulations, industry-leading practices and recognized international standards on the information security management system.

Scope

Information Security Management Systems (ISMS) applies to IT Infrastructure and its associated services, namely, IT Delivery, Infrastructure, & Security Operations along with support functions HR and Admin to provide secure and quality services to its customers.

Policy Framework

The ISMS is committed to satisfying applicable requirements relating to Information Security and is committed to continual improvement of Information Security. Information assets are critical to the success of our business. We shall, therefore, ensure the confidentiality, integrity, availability and legality of the information and information processing assets of our customers and our Organization by deploying appropriate people, processes, and technology.

1.1 All employees of Mindspace Business Parks REIT’s network and third-party users shall be responsible for adhering to and remain in compliance with the ISMS in accordance with the policies and procedures.

1.2 This Information Security Policy shall be communicated to all employees through onboarding and periodic training as well as by storing it in some shared location or publishing it on the website of the Organization.

1.3 Information Security Policy should be communicated to all interested parties.

Policy Statement

- Mindspace Business Parks REIT has obtained ISO/IEC 27001:2022 certification for their Information Security Management System (ISMS). The certification, issued by Intertek, covers centralized IT, HR, and administration functions across multiple locations, including the corporate headquarters. This certification underlines the Mindspace REIT’s commitment to maintaining robust information security practices and compliance with international standards.

Vulnerability Management Policy

This policy is committed towards the protection of IT infrastructure including servers, applications, network, databases and security devices with security, reliability, and stability. The technical vulnerabilities of Information Systems and infrastructure shall be identified and evaluated to ensure adequate measures are taken to address the associated risks. All discovered vulnerabilities are assigned a Common Vulnerability Scoring System (CVSS) and shall be reported and addressed appropriately to mitigate the identified risks within specified timelines.

Supplier Management

The purpose of this policy is to ensure that Mindspace REIT Business Park's suppliers, vendors and third-party contracts follow information security requirements while accessing and managing the Organization's information assets for service delivery and/or during service delivery.

Information Security Incident Management (ISIM)

A security incident is defined as any event which affects confidentiality, integrity or availability of data in the enterprise. Security incidents can be successfully managed by having a clear incident management policy in place.

a. Information Security Incident Management Policies

The purpose of this policy is to define standard methods for identifying, tracking, promptly responding and remediating IT Security Incidents.

ISIM applies to all physical, network and computing assets owned and/or administered in the enterprise. All Employees of the entity are required to follow this procedure for reporting Information Security weaknesses and incidents. Our IS Head/Chief Information Officer is responsible for information security implementation and best practices within the organization.

b. Business Continuity Program (BCP)

BCP focuses on continuity of critical business processes. Each document shall be updated on a periodic basis and records of the same shall be maintained. This policy enforces a consistent way to maintain, evaluate and update the Business Continuity Management (BCM) documentation and ensure that changes to the documents are performed in a controlled and systematic manner.

The incident response plan shall be used in the event of system compromise addressing specific incident response procedures, business recovery and continuity procedures, data backup processes, roles and responsibilities, and communication and contact strategies. The plan is tested periodically, and appropriate training shall be provided for staff with security breach response responsibilities.

All documents are prepared in accordance with ISO 27001:2022.

Compliance

The information systems should be regularly reviewed for compliance with the information security policies and standards & IT Act.
